**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Favakeh on September 8, 2009.

The application has been amended as follows:

Cancel claims 1, 2, and 6.

***Election/Restrictions***

Amended claims 1, 2, and 6 were directed to an invention that was independent or distinct from the invention originally claimed for the following reasons:

Claims 1, 2, and 6 positively recited the belt fastener and were therefore directed to a combination, whereas the originally presented claims were directed to a sub-combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed did not require the particulars of the subcombination as claimed because the combination

did not require either the integral drive heads (claims 3, 9, 13, or 21), or the molded portions (claim 7) of the sub-combination. The subcombination had separate utility such as use in a machine to connect plates.

Restriction for examination purposes as indicated was proper because all these inventions listed in this action were independent or distinct for the reasons given above and there would have been a serious search and examination burden if restriction were not required because one or more of the following reasons would have applied:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Since applicant had received an action on the merits for the originally presented invention, this invention was constructively elected by original presentation for

prosecution on the merits. Accordingly, claims 1, 2, and 6 were withdrawn from consideration as being directed to a non-elected invention (see 37 CFR 1.142(b) and MPEP § 821.03) and subsequently canceled with applicant's consent.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Gregory Pickett whose telephone number is 571-272-4560. The examiner can normally be reached on Mon-Fri, 11:30 AM - 8:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 571-272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
